Enhance your vehicle's factory-certified warranty

Enhance your vehicle's factory-certified warranty

Purchasing a vehicle is a significant investment that is worth protecting. While vehicles today are built better than ever before, there is always the chance of a mechanical breakdown that requires a major repair. Having an underlying factory-certified powertrain warranty is a great start, but there are many other parts and components that won't be covered.

With a vehicle service contract, you can help protect yourself against unexpected repair costs that may result in significant out-of-pocket expenses. Certified+Plus Care has been specifically designed for vehicles with a limited warranty under the manufacturer's certification program. We offer two levels of expanded coverage that include the engine, transmission and drivetrain assembly plus many additional components and parts.

Repair costs based on nationwide averages for claims paid. Actual costs may vary. See contract for full list of covered parts and components; additional terms and conditions may apply.
